## ABOUT ME

As a Full Stack Developer with 1 Year of experience, I have a strong understanding of both front-end and back-end development. My best qualities include being highly adaptable, detail-oriented, and having best problem-solving skills. With proficiency in various programming languages such as JavaScript, HTML, CSS and experience working with frameworks like ReactJs and ExpressJs. I am able to deliver high-quality and efficient solutions.

## WORK EXPERIENCE

### • FORTUNEONE CRM

Duration : 6 Months

- Developed a comprehensive internal CRM system integrating 8 different departments.
- Designed and implemented a role-based access control system with hierarchical permissions including Super Admin, Admin, and Executive roles.
- Ensured smooth data flow and collaboration between departments.

### • FORTUNE LEAD-X

Duration : 3 Months

- Built a lead management platform focusing on tracking and nurturing sales leads.
- Developed dynamic dashboards and real-time lead tracking using MERN stack technologies.
- Integrated APIs and optimized performance for seamless user experience.

### • FORTUNE DIAL (ONGOING)

Duration : ongoing

- Currently developing a cloud-based telephony service platform designed to manage and streamline voice communication workflows for businesses.
- Building features such as virtual numbers, call routing, call logging, agent allocation, call reports, and a centralized admin dashboard.
- Designed for use by clients, administrators, and technical support teams, the platform helps manage high call volumes with real-time tracking and monitoring tools.

### • COURSES

- Java Full Stack Developer, JSpiders, Bangalore
